MIHAJLO DJORDJEVIC

Senior Data & Business Analyst · iGaming · Digital PR · Performance Data

Niš, Serbia (open to remote) | mihajlo.dj25@gmail.com | linkedin.com/in/mihajlo99

PROFILE

Senior Data Analyst with 3+ years at Better Collective, a global iGaming affiliate and performance marketing company. I turn large, multi-source datasets into campaigns, dashboards and insights that drive measurable KPIs. Data-led campaigns I built have been featured across US, Canadian, European and South American media, generating high-value backlinks for the business. Strong in Python automation, SQL and BI reporting, with a track record of translating complex data into clear conclusions for non-technical stakeholders.

10–15%	500K+	Days → hours
of the team's most important KPIs	price points in one automated run	manual collection replaced by pipelines

WORK EXPERIENCE

Senior Data Analyst | Better Collective

Aug 2025 – Present

- Design and deliver the data behind Digital PR campaigns (collection, analysis and dashboards used by journalists), with media coverage across the US, Canada, Europe and South America
- Campaigns regularly picked up by major news outlets, several going viral. My projects contribute to the team's KPIs every month, **delivering up to 10–15% of the team's most important monthly KPIs** in peak months, and helped the team exceed its monthly targets
- Built modular, multi-stage Python pipelines (APIs and web sources) with SQLite storage and CSV outputs feeding Google Sheets and Looker. Example: a full-season ticket-price dataset for home games of ~30 teams, **500K+ individual price points** collected in a single 2–4 hour automated run
- Automated multi-source social media profile data collection, replacing several days of manual work per project
- Built in-house data collection solutions in place of paid third-party tools, keeping tooling costs at zero
- Build multi-page, multi-source Looker dashboards for the PR team and journalists
- Mentor junior analysts and maintain reporting and data-quality standards across the team

Data Analyst | Better Collective

Jul 2024 – Aug 2025

- Automated recurring reporting workflows and data tasks in Python, reducing manual effort
- Combined and cleaned data from multiple sources into interactive Looker dashboards for performance tracking
- Extracted insights from diverse datasets to support campaign decisions and KPI tracking
- Improved reporting consistency and data reliability through structured validation

Junior Data Analyst | Better Collective

Apr 2023 – Jun 2024

- Collected, structured and prepared sports-related datasets for analysis in Google Sheets
- Built reporting foundations in Looker and spreadsheets in a fast-paced, international environment

SKILLS

Data & Automation: Python (automation, web scraping, API integrations), SQL / SQLite, multi-source data integration

BI & Reporting: Looker Studio (multi-page, multi-source dashboards), Google Sheets & Excel (advanced), Power BI (currently expanding)

Analytics: KPI tracking, campaign performance analysis, trend and anomaly analysis, stakeholder reporting

AI Tools: daily use of AI tools for analysis, automation and faster delivery

EDUCATION

Bachelor of Software Engineering | Singidunum University, Niš *2018 – 2022*

LANGUAGES

Serbian: native | **English:** fluent
